

Questions Assignment 3

**Adjust the response space according to your needs.*

** For answers that include data, please include a screenshot with the appropriate size for proper viewing.*

1. When you first open Remix, you will see multiple icons on the left-hand side of the screen. Find the four icons shown below. What toolbars do they open? (The last one has been done for you).

_____ **PLUGIN MANAGER** _____

2. What is the bytes32 value that your smart contract returns? Copy and paste in the box below:
(In addition to providing your answer, please include a full screenshot)

Bonus: If you decide to answer this optional question, write the string memory value that your smart contract returns here. (In addition to providing your answer, please include a full screenshot)

Hint: Use the following web page for transforming hex to ascii/text: <http://www.unit-conversion.info/texttools/hexadecimal/>

3. What will you name your token?

4. So that the learning facilitators can review your Etherscan contract, what is the address of your newly deployed token? (In addition to providing your answer, please include a full screenshot)
5. What type of token would you use (Currency, Resource, Asset, Access, Equity, Voting, Collectible, Identity, Attestation, Utility)?
6. In a few sentences, describe your token. Who would use it? When would it be used? How can you convince people to adopt your token?
